| Exhibition | 2022 Crossover Crafts. Values and Practices. Mix and Regeneration in Tainan Art Museum |

Through a meeting in college, I met Teacher Chang Yong-Wang and began to enter the world of bamboo, engaged in the promotion and education of bamboo weaving ever since. From teaching assistant to lecturer, teaching and learning are mutually beneficial for me to realize that bamboo is not only a plant, a material, but also a way of life. In teaching, we follow the norm of "bamboo weaving for life", starting from life and culture and moving on to the bamboo weaving techniques, later transforming them into modern applicable methods. With the flexibility of the teaching content and the wide-range of acceptance, the bamboo weaving of life can be implemented in life, and the value of each work is enhanced through practical use.

At the end of 2021, Bamboosays Workshop was established. "The beauty of bamboo lets the bamboo speak for itself." Bamboo is simple and friendly to the environment, but she needs to be understood through explanations, and craftsmen are the ones who let bamboo speak.
